

Dr. Peter Stock is a Professor of Surgery and a multiorgan transplant surgeon at the University of California, San Francisco, and performs kidney, pancreas and liver transplants. He also serves as the Surgical Director of the Kidney and Pancreas Transplant Program at UCSF, as well as the Pediatric Kidney Transplant Program. His translational research explores beta cell replacement for the treatment of Type 1 diabetes, and he is currently co-Director of the UCSF Pancreatic Islet Transplant Program and was co-PI on the CIRM (California Institute of Regenerative Medicine) stem cell initiative to bring stem cell-derived beta cells to a clinical trial. He was a co-Investigator on the NIH-sponsored Clinical Trials in Islet Transplantation (CIT), as well as a site-PI on the NIH-sponsored Clinical Trials in Organ Transplantation (CTOT) studying the induction of transplantation tolerance to block alloimmunity and recurrent autoimmunity following solid organ pancreas and pancreatic islet transplantation. He is the Principal Investigator on the NIH U01 multicenter trial studying the immune response following liver and kidney transplants in people with HIV. Dr. Stock was President of the American Society of Transplant Surgeons (ASTS) from July 2014-May 2015.
